LEAD STORY

STRATEGIC PARTNERSHIP · MTIS x PULSAR

**MTIS and Pulsar sign strategic agreement**

MTIS S.A. and Pulsar — a global leader in satellite communications, digital solutions and managed network services for maritime, land and government customers — have signed a new agreement marking a significant strategic alliance. The agreement provides for the installation of MTIS SeaSmart™ and i-Platform© across Pulsar's installed base, combining Pulsar's global satellite infrastructure and connectivity with MTIS's digital solutions. The result: smart, connected vessels monitored remotely, with their data analyzed in real time and decisions optimized — at any moment, anywhere in the world.

## LATEST NEWS

PT PORTUGAL · ZLT NAVAL TESTS

### i-Platform© Selected for Evaluation by the Portuguese Navy

MTIS has been selected to conduct operational trials of the i-Platform© within the Portuguese Navy's ZLT Infante D. Henrique Test Zone Framework. The trials are scheduled for 27–30 April 2026, following the coordination meeting with the Portuguese Navy on 21 April. This evaluation marks a significant milestone for MTIS's international naval expansion and paves the way for broader collaboration with NATO partners.

MTIS NEW MODULE

### New Optimal Routing Module

MTIS launched a new Optimal Routing module which combines weather data, sea conditions and engine status to achieve optimal fuel savings and reduce CO<sub>2</sub> emissions.

POSIDONIA 2026 · JUNE

### MTIS at Posidonia 2026 — Stand 1.105 Hall 1

MTIS is organizing exclusive presentations at Posidonia 2026 (June 1–5, Metropolitan Expo Athens) — the world's largest maritime exhibition with 30,000+ visitors.

Topic: AI, IoT and Digital Sovereignty in Commercial and Defence Maritime.

Visit us at Stand 1.105, Hall 1.

MTIS PREDICTIVE MAINTENANCE

### New Vibration Analysis Module

The company introduced a new Vibration Analysis module, a key predictive maintenance technique that measures and interprets machine vibrations (amplitude, frequency, phase) to detect early-stage mechanical faults like unbalance, misalignment, and bearing wear. Using sensors and software to analyze wave patterns helps avoid unexpected downtime, reduces repair costs, and extends asset life.

*"Today, ships don't just sail. They think, adapt and protect themselves — and the seas around them." MTIS i-Platform© · TRL 9 · 300+ Vessels · Hellenic Navy*

## 2026 MILESTONES

PERIOD	ACTIVITY / MILESTONE	
• Oct 2025	Technical seminar co-organized by MTIS & Hellenic Navy General Staff at Salamis Naval Base — 60 naval officers. Confirmed operational performance of i-Platform© aboard ΤΠΚ ΒΛΑΧΑΚΟΣ.	✓
• Mar 2026	Partnership agreement MTIS × Pulsar — Installation of SeaSmart™ & i-Platform© across Pulsar's global fleet.	✓
